Ecofish Research Ltd. Accelerates Northern B.C. Growth with new Offices and Hiring Plans in Terrace, B.C.

Terrace, B.C. (July 11, 2019) [Ecofish](#) Research Ltd. (Ecofish), a Vancouver-based science and environmental consulting firm, has opened a new, larger office in Terrace, B.C. Our team in Terrace is growing in response to an increasing demand for environmental services in the Northern B.C. region and this new space will allow us to better accommodate this important, growing market.

The Ecofish Terrace team is led by Jayson Kurtz, Project Director, Senior Fisheries Biologist, who comments, “We are seeing a great need for our environmental impact expertise in Northern B.C. infrastructure, energy, and mining projects and are expanding our team to meet the demand.”

“Ecofish supports responsible development and encourages local initiatives,” says Adam Lewis, President, Ecofish Research Ltd, “Our team delivers the solutions that keep resource projects compliant with regulatory requirements, protecting the environment. We are proud to support Northern B.C.’s environmental initiatives like B.C. River’s Day, stream restoration projects, and fisheries management out of our Terrace location, as well as our seven other offices across the province.”

Office Locations: Vancouver | Toronto | Courtenay | Victoria | Nanaimo | Campbell River | Squamish | Terrace | Cranbrook

“Our company is currently working locally with Rio Tinto, AltaGas, and Coastal GasLink,” adds Jayson Kurtz, “As development increases in this area, the Ecofish team is ready to respond to any industry that may require our effective solutions to tough environmental challenges.”

Located at Suite 101-2918 Eby Street, Ecofish has plans to continue to expand the Terrace team with recent graduates and more environmental professionals. Ecofish plans to offer paid internship opportunities for students enrolled at the University of Northern B.C. in Prince George and Coast Mountain College in Terrace. About Ecofish Research

Ecofish was founded in Vancouver in 2001 to meet the need for reliable, trustworthy, science-based environmental consulting. Since then, the Ecofish team has worked effectively with stakeholders, regulators, and Indigenous Groups to improve the environment and operations for over 500 projects in B.C. and internationally. Known province-wide for their unrivalled expertise in the hydroelectric sector, Ecofish’s growth in recent years has expanded their breadth of expertise into the port infrastructure, mining, marine and offshore, and oil and gas sectors, with an emphasis on working with local communities and Indigenous groups. Ecofish’s science-based solutions and business acumen help their clients overcome today’s unprecedented environmental challenges. The company was recently listed in the Growth 500 Canada’s Fastest-Growing Companies 2018 list with Canadian Business and Maclean’s magazine.

Ecofish has offices in Vancouver, Toronto, Victoria, Squamish, Courtenay, Terrace, Campbell River, Cranbrook and Nanaimo.
